### NEBRASKA CITY'S NEW LIFE.

The Remarkable Business Derival in Otoe's Old M tropol s.

BUILDING ON A NEW BASE.

The Packing Houses, Cooper Shops, and Agricultural Implement Factory-Other Import ant Interests.

NEBRASKA CITY, Nov. 13 - | Correspondonce of the BEE.I-The excitement of election being over our citizens have settled down to business again and are using every means in their power to boost the old city into prominence as an important manufacturing city, and with good success, too. Several large enterprises are "on the string" and the board of trade and business men generally are doing everything in their power to make the prospective enterprises a present reallty. Even some of the "old fogies"the barancle element as the Press calls them-bave been known to open their purse strings of late and donate liberally toward the new enterprises which are being worked up. Last Saturday a com-mittee from the board of trade secured \$48,000 stock in a new reaper and mower manufactory, a scheme which is being agitated. The balance of stock necessa-\$27,000, it is said can be easily raised. The new enterprise will work 3.0 men the year round and will do a general implement manufacturing business. J. Sterling Morton, with his accustomed liberality, besides subscribing largely to the stock, presented the new company, with twenty-five acres of land us a site for their establishment. THE THANS MISSOURI PACKING CO.

the name under which the new packing house company is known, have their I'u lding completed and are now busily engaged in lifting up the necessary ma-chinery and expect to be ready for the festive porker Nov. 16. The Nebraska and lowa Packing Co, begin their winter killing this week and will work full time from now on. The latter company have large force of graders at work upon the ice point enlarging the same to twice its ce pond, enlarging the same to twice its former size to preclude all possibility of the ne snapply failing next year, as was the case both years past. STOCKVILLE,

Your correspondent took a flying trip to Stockydle addition. This is the "New Ne raska City" addition spoken of in a provious letter, but which has been re-christened "Stockville Addition to Ne-braska City." Everything thereabouts indicated the greatest activity. The N. & I.P. Co had a large force employed getting their immense establishment and and grounds in shape for work. The new consolidated cooper shops had already commenced operations and were working a full complement of men turning out park barrels and tierees for both packing houses. The boop-poles necessary in the manufacture of the cooper age are being cut near the city, and al ready quite an industry in hoop-pole cutting has been started by many of our adjacent farmers.

The B & M. R. R. Co. has a large force

of men at work upon the stock yards and expect to have the same ready for bus-Iness Nov. 16.

ANOTHER RAILROAD. Nebraska City needs another railroad, and needs it bad, and any first-class railroad that is nosing around for a good objective point cannot do better than look over Nebraska City. What with two packing houses, with a capacity of 3,050 logs daily, reaper and mover manufacturing company, working 3:0 maids, immensa cooper shops, distillery, flouring mill and a score of other good-sized manufacturing enterprises, our city offers in-ducements in the way of freight traffic that cannot be sneezed at. President Perkins, of the C. B. & Q. R. R., was in the city a few days ago and talked quite favorably of a new time table, which will enable Nebraska City people to visit Omaha and return the same evening. As it is now, it is as much of a trip to Omaha as to Denver or Chicago. Our erty came very near having an "item" last week. The son of a prominent professional man of this city forged his father's name, to a check for \$20, and, being detected, tried the landanum route to the celestial regions. A liberal dose of spiced whisky convinced the young man that life was still worth figuring on, and the v. m. has gone east to grow up with the country.

is on the tanis for our city. It is to be a weekly devoted to prohibition, and, of course, it is intended to "fill a long felt want," and, of course, hopes to crow deficulty on the Nebraska City grave-yard of defanct newspapers for many

years to come. Some of our merchants are talking

PROTECTIVE ASSOCIATION, which shall have for its especial object the protection of the different business men of the association from the ravages of a goodly number of the deadbeat order who make their habitation in Nebraska City, and who receive acquisitions to their number from time to time. scheme, if conducted by the right kind of a man, would save our merchants many hundreds of deliars annually.

The ground plan of the NEW GOVERNMENT BUILDING has arrived, and it is expected work will be commenced upon the structure at once. The photograph of the new building, as shown your correspondent, is one which will be a very decided ornament among the public buildings of our citya Norman design, at the same time on que and elegant. It is said that Mr. John P Brown, a prominent architect and contractor of this city, will have the opervision of construction of the new building.

A big scheme is or foot among the 'West End Dutch' who have long harbored ill-feelings toward the East En-Morton house, to purchase the Grand Central property, take out the store rooms underneath and convert the en-tire building into a first class hotel with all the necessary conveniences—elevator, electric bells, water system, etc. A wellknown hotel man, one of the best in the west, is now in the city watching the out-come of the new scheme, which it is to be looped will culminate favorably and give the upper part of the city a strictly first class hotel as well as the eastern end.

Mr. A. Ross, who closed his brewery when the city ordinance was passed de claring brewers subject to the \$5.60 tax, has lately reopened and is now manufacturing beer as of yore. This in connection with one new saloon which has just been started in the west end by Messes. Holfman & Bock, makes twenty-two places where anti-St. John juice is dis-pensed which we opine is fully adequate to supply the demand of the thirsty citizens. An addition of two stories has just been finished to the Cincinnati house in order to accommodate the rush of travelers to the favorite hostlery. Three new boarding houses are being fitted up in anticipation of the boom which we expect from our prospective

new enterprise. The Gas cympany is laying mains to the depot and it will be but a few days before our depor and the street leading

to same will be lighted by gas.

The street car company is laying low just new to await the outcome of the new resper and mower manufacturing scheme as it is probable they will want

to change their route considerable it the new enterprise is located where it is now contemplated.

Applications for the position of princi-pal of the second ward schools, which will soon be vacant by reason of the present incumbent having been elected county superintendent, are rushing in lively—already a score or more have

Mrs. Melinda Fietcher lectured Monday night under the auspices of the Laties brary association to a good audience and quite a sum was realized for the

above association.

Belva Loekwood—the great and only—will lecture in this city—next—Wednesday

The first cold windy night of the season starts the record with a good fire the residence of H. A. Newman being burned to the ground

A brige sand bar is forming above the bridge and the ferry boat has been forced to suspend operations. The railroad company it is said will put in flat cars similar to those in use at Omaha on the bridge for the transferring of teams, &c. As it is now the company charge \$30 per ear and upon one occasion the car contained one lone emigrant team, for which the usual \$.0 fee was charged, making a rather expensive transfer. Aiready the newly-elected county offi-cers are being followed everywhere by a hungry horde after the various deputy snips. So "Ere See."

Consumption. Notwithstanding the great number who yearly succumb to this terrible and fats sease, which is daily winding its fatal coils around thousands who are uncon-scious of its deadly presence, Dr. Pierce's "Golden Medical Discovery" will cleanse and purity the blood of scrofulous impurities, and core tubercular consumption (which is only scrofulous disease of the Send to cents in stamps and get Dr Pierce's complete treaties on con-sumption and kindred affections, with numerous testimonials of cures. Address, World's Dispensary Medical Association, Buñalo, N. Y.

CUMING COUNTY POLITICS. The Recent Republican Victory and Valentine's Aspirations.

WEST POINT, Neb., Nov. 14 .- [Corres pondence of the BEE. ]-This little city has not yet recovered from the excitement of the late election. On every street corner, and in every store and office, knots of men are seen discussing the recent republican victory. The great majority are satisfied with the result, but a few, mainly the candidates, are deeply is his method of diagnosing disease. chagrined.

Your correspondent, knowing, as does everyone acquainted with Cuming counte's political history, that heretofore the democrats had carried the county for their candidates by handsome majorities, essayed to get at the true inwardness of the present state of affairs, and suc-

ceeded with this result: When the republicans held their convention, the influence of certain democrats was exercised in behalf of republicans anxious for republican nominations; then, as soon as the democratic convention met these same democrats nominated themselves-they controlled the democratic convention-for the same positions for which they had endorsed the republican aspirants. This action caused a revolt in the ranks of the "unerrified," and before the election was held, prominent democrats were offering to bet five to one that not a man on their party ticket would be elected, but with-

out any takers. A gentleman here, prominent in busi ness circles, who always votes a straight democratic ticket, promptly contradicted me when I made the assertion that the republican party had carried the counting the assertion that the democrats had carried the county, and would continue to carry it in the same way whenever a similar trick was resorted to by unprincipled partisans; and when men were nominated who grown fat off the county through jobbery and at the expense of the laboring man. By the way, there is a rumor affoat up here that Valentine is setting his pins for the governorship. A very confidential friend made this startling announcement. and added at the same time, "very few people are aware of it." This was news to me, and thinking it might not be generally known, I made a note of it. you suppose it can be a "tle-up" between the venerable chairman of the state cantral committee and Val., for the influence of the latter in helping to vindicate the former gentleman's bolt of last spring: A great general offered a kingdom for drink, may it not be that the promise of a governorship would secure a vindrea-"We shall see what we shal see,

I listened to a conversation between two gentlemen, last evening, that gave me very clear insight into what the gen-eral feeling here is regarding Senator Van Wyck. They were discussing the senstor's recent appeal in behalf of honest union labor, on public buildings in preference to convict labor, and they both coincided in the belief that one ac will make him stronger with the labor-ers, skilled mechanics and farmers, than anything he has ever done, and aid in making, if it does not make, him his own successor.

A sure cure for Blind, Bleeding, Itching and Ulcerated Pdes has been discovered by Dr. Williams' Indian Pde Olutinent, A single box has cured the worst chronic cases of 25 or 20 years standing. No one need suffer nve minutes after applying this wonderful soothing medicine. Lotions and instruments do more harm than good. Williams' Indian Pile Ointment absorbs the tumors, allays the intense itching, (particularly at right after getting warm in beat), acts as a positice, gives histant rehet, and is prepared only for Piles, itching of private parts, and for nothing else.

Telling About the Cures of Dr. E. C. Flower, of Boston.

Statements of Some of the Wonderful Cures Made by this Extraordinary Practitioner-Almost Miraculous.

From the Baltimore American: We published a short time ago quite a lengthy article about the professional work of Dr. R. C. Flower of Boston, We have recently come into possession of a pamphlet devoted to the life and work of Dr. Flower, giving numerous accounts of his MIRACULOUS CURES

and almost supernatural triumphs over disease. We believe a review of the same would be highly interesting to our readers. The book reads more like a fairy story than anything else, yet every claim and assertion is substantiated by numerous facts.

We publish below a number of extracts from this book that our readers may know more about the doings of this wonderful physician who seems to have stirred the earth with his professional triumphs from center to almost circum-The first chapter is a biograpaical history of the doctor, which starts out by saving:

"For some years Dr. R. C. Flower has startled the eastern world from time to time, by performing what has seemed miraculous or supernat-nral cures. One writer, indeseribing Dr. Flower's triumphs in the sick room, says: 'Sickness is a toy in his bands; in the most phenominal way he sheds light into the darkened eye, life in-to the dying form, and robs the sek room of its sunerer and the codin from its

prey. Proper has been called to consult over important and bad cases from the Rockies to the Chesapeake, from Canada to the Rio Grande. It's greatest ability is seen in desperate cases, and his mightnest feats and most miracolous cures at the deatabed itself.

"Dr. Fower is a young man but 34 years of age, smooth face, monum size, very large head. He is a hard student. deep tainker, a man of remarkably quick perception and intuitional faculty, which

ere said to be marvelous. "A phenomenal feature in his practice never asks a patient his trouble, but the instant he takes the hand of a sick per-son he tells most accurately the disease in all its ramifications. This phenome-nal phase of his practice has brought to him thousands upon thousands of patients, and it is claimed that out of upwar is of one hundred thousand examinations he has never made a mistake.

"In the business world Dr. Flower is as great a wonder as he is in the practice of medicine. His intuitional powers in detecting the actual condition of the markets seem about infalfible. If he buys stocks tacy go up; if he sells they go down. He has made fortunes for many of his friends, and saved many from ruin.

"He is a man of great individuality, s man of methods, a man who, from all appearances, does the work of a bun-

Following is an interesting biography of his professional career. Next is a chapter upon liss MIRACULOUS CURES,

which reads mero like the curing of the sick, making the lame walk, and the blind see of eighteen fundred years ago than anything else The chapter following entitled

A MEDICAL WONDER. leads you still further into fascinating almsof waat seem to be miracies. Among those startling accounts and miraculous cures is recorded the case of a gentleman for many years a sufferer visiting Dr. Flower, as a last resort, in search of As soon as Dr. Flower saw him he said: "You have a live animal in your stomach, and one which belongs to a southern country. You must have swal-

lowed it many years ago." The horror stricken man replied: "I was afraid I had." He then stated that e was in the army, during which time,

he frequently drank from the And shortly after leaving t er, he felt the creature, as the doctor described it, in his stomach, and that for every ninute of his life for the last tifteen years ie had been in perfect dread and pretty nuch all of the time in great agony. Dr. Flower took charge of the case. It was soon apparent that the first remedy was a death blow to the creature, and there soon began to pass away scales and bones and pieces of feet. The man received immediate relief, and is to-day comparatively a well and hales man. The long letter headed

MIRACLES, IF SUCH THINGS ARE,
Written by the editor of the Boston
Traveller, which is one of the largest,
most reputable and conservative journals of the east, after the most thorough in-vestigation of Dr. Flower and his practice must always be, at least to the a most interesting collection of facts.

The readers of the Traveller are well acquainted with the name of Dr. R. C. Flower, of Boston, Massachusetts. In fact, no professional man in America is better known than this successful, energetic, skilled physician of the 'Hub.'

HIS PROPESSIONAL STANDING.

Professionally, Dr. Flower stands very high, and with the progressive and beral physicians, is preseminently ader. His opinion in very crit cal case is regarded final. A distinguished Bos-ton physician of forty years' practice said to your correspondent: Tregard Dr. Flower as the most wonderful of men. Why, sir, I have called him at different times to see twenty-one of my patients, after I had submitted the cases to the best medical talent in the the best medical talent in the city, only to have them confirm my onlinon, adding that life could last but a short time at the longest. Well, out of the twenty one cases, Dr. Flower, after his examinations, pronounced for as incurable. Reporter-And did they die: 'Yes, sir the longest only lived one hour and nety minutes. Of the other seventeen he said in his judgment they would recover if certain treatment were observed. He suggested treatment I had never used and in some instances never heard of 1 followed the directions to the leafer, and, to my surprise, every one of the seventeen patients got

every one of the seventeen patients got well. I tell you, sir, there is destiny in Dr. Flower's discusses of disease. He reads the internal condition of a patient the same as you would an open book. "Personally, Pre-Flower is exceedingly popular and his friends being largely of the old, leading and representative families of the east, gives him great strength at his home. He is a young man, having just passed his thirty fourth birthday, although to look into his clean-shaved. though to look into his clean-shaved, smiling face you would not judge him

He then gives them a number of cures performed by Dr. Flower, which would seem to vie with the mireclass of olden times: and were it not for the corrobora-ting proofs and the parties themselves still living to testify to their trath, these seemingly extraordinary claims would not be admissible in living point. We extract the following as a few from almost numberless cases cited, which will

give our readers a partial idea of Dr Flower's almost supernatural triumphs over disease and death: Mrs. W. H. Shaw of Portland, Mains.

This philanthrop'e woman is well known thronghout the cast, and, by her friends as well as her physicians, was regarded as incurable. Dr. Flower with such skill removed the three cancers, as well as thoroughly cleaned her system, that many regarded her core mirrorities. Mrs. Shaw told your correspondent that the winder and a vary side person in the she wished every sick person in the world knew what Dr. Flower had done for her, and what he can do and is doing every day for the sick. 'Why,' confirmed this enthusiastic lady, 'look what he has done for me. I came to him nearly dead to day I am in better health than I have been since early life, he snatched are from the jaws of death and cured me of my disease with the case that a March wir would lit a straw. I tell you, sir, he is a remarkable man. To come into his pres-

ence is health; to touch his hand is cure

Dr. Flower's patients are numbered by thousands. This may sound lead, but it is true. He has thousands of patients all "These, Mr. Editor, are facts given in an unvarnished way, this is an exhibition of his powers. Call it what you may, but when it comes to a man standing in the presence of a dying patient, all caten up and racked with pain, making a prophecy as to the future of the patient, and then go to work and fulfill his own prophecy, which is apparently the changing of natural and inevitable events. I saw when it comes to a man doing this constantly, it calls for the honest investigation of the public, rather than sneering criticism from professional

He closes his thorough and critical in-vestigation of Dr. Flower and his practice as follows:

vast and wonderful accumulation of facts pertaining to Dr. Flower and his cures. They are mets, cold, solid facts, and are as startling as a voice from death. "From the crowds which throng his spacious office, No. 1763 V. ashingson St. carner of Chester park, you might inter that all the sick in the world were seek ing at his hands relief. Whether the the-ory of many, that Dr. Flower holds the key of life, is true or not.

THIS IS TRUE. That he changes in atmost a miracelous manner, the sick bed into a healthy couch, robs death of its spoil by saving annually thousands from a premature grave. His happy patients thus mysteriously cured, live in every land, and upon these joyful homes the sun never

The rest of the book is devoted to Dr. Flower's methods of treatment; of his occasional journeys south and west for the purpose of seeing such patients as need a professional interview. unable to make the journey to Boston, also a number of testimonials, representing many of the prominent and leading men of the east. Among these testimo nials we notice the strong endorsements or J. Willard Rice of Boston, ex-mayor of the city, and brother of Governor Rice, and head of the great manufactur-ing firm of Rice, Kendall & Co. Mr. "I have known Dr. Flowe intimately for 'ears. He is a higaly educated and cultured man, and I know personally of MANY REMARKABLE CURES,

Both of ladies and gentleman, effected by Dr. Flower, whom I unhesitatingly declare to be a wonderful physician, an elegant gentleman and a valued friend." From the careful reading of this book it will be seen that Dr. Flower held the key of life and death at least in many in-stances when hope everywhere else had failed. That his ability to detect disease let it be ever so subtle hidden, is more than the natural and his power to cure the most helpless cases, even in death' shadows, smacks strongly of the super natural. Though in justice to Dr. Flower, we should say that he does not claim that there is anything superustural about his work. Bearing upon this subject we will quote Dr. Flower's own words: "Supernatural? No, sir, I make no such claim. Such belongs to the readers of the Divine." "Then, doctor, how do you account for be cures you are performing daily? "Your question is one I would rather not answer. That I cure where others fail, that I make the blind see, the deaf hear, and the lame walk, and that I res cue from death's jaw the sick and dying when abandoned by all others, and the last vestige of faith has died upon the altar of a blasted hope, is a fact known to tens of thousands who are living wit

nesses of these cures."

This exciting and interesting little book, giving a brief history of a more exeating and interesting character, is pub-lished by Deland & Barta, 54 Pearl street, Boston, Massachusetts, and will be sen free to any one sending a 2-cent stamp It should be in the hands of every sick person. It should be read by every one

Moody found the first place where he scenical to make no impression, whatever in New York city on the cist side. The open-ing of the new Broome street laborance was reserved for his coming in the hope that a revival began under Moody's leadership could be carried on to advantage. But after six days without a conversion the undertaging was abandoned.

THE BEST WASHING COMPOUND of the day is undoubtedly JAMES PYLE S PEARLINE. It cleanses the dirtiest and most elegant fabric without injury and with little labor. For sale by
